

The Digital Platform for **International Insurance** Management within the TRC Broker Network

DIGIT

About TRC

Trust Risk Control is an independent coordinator of international insurance programs, based in Hamburg, Germany.

As a neutral service provider, TRC works exclusively with a select group of trusted brokers.

What is TRC DIGIT?

TRC DIGIT is a digital platform for the structured collection, management, and evaluation of international insurance data. It empowers network brokers to manage their role in international programs more efficiently and transparently — in close collaboration with Trust Risk Control.

Who is TRC DIGIT for?

For brokers within the TRC network who support international clients — whether as the leading broker in the home market or as a local partner placing coverage on the ground.

Your Benefit as a TRC Network Broker Using DIGIT

- ✓ Structured Data Collection
- ✓ Centralized Collaboration
- ✓ Reporting & Transparency
- ✓ Reduced Administrative Effort
- ✓ Professional Presence

Key Features

- Input templates for local policies & premiums
- Upload function for documents and certificates
- Automatic consolidation into client-ready reports
- Intuitive user interface
- Role-based access for brokers and clients
